

I WONDER...

When you find scat

- ... what the animal was eating?
- ... what animal it's from?
- ... when the animal passed by?
- ... which direction the animal was going?
- ... where the animal gets water?

when you find a plant

- ... what's eating it?
- ... why are these leaves darker than those?
- ... how its leaves feel?
- ... how this flower is different than that one?
- ... if it likes sun or shade?
- ... how many more just like it we can find in our yard?

when you find a tree

- ... when it will bloom?
- ... what its fruit will look like?
- ... why its growing here?
- ... what its bark feels like?
- ... what it looks like without leaves?
- ... what animals like this tree?

when you're outside

- ... where the sun came up?
- ... if the wind will bring a weather change?
- ... where these ants are going?
- ... what phase the moon is in?
- ... what can we smell in the air?
- ... why that bird is chirping?
